

Change Requests eSchKG as of Feb 18, 2017

ID	Description	Status
001	Offices shall report payments received to the creditor (reverse PN).	open
002	Provide fees and charges in sufficient detail. Provide billing information like payment contact, total amount of bill, deadline etc. This could be done using a new sequence.	open
003	Expand field length of names and addresses so they can contain larger strings.	open
004	Adapt the sequence concept such that the office may send multiple messages of the same kind in a particular case. This is to allow for corrective information from the office to the creditor	open
005	Allow for a realisation waiver in the RR message, so creditors can say "I do not want the office to execute the realisation of the seized assets".	open
006	Introduce a new message so offices have a way to announce the closure of a debt collection.	open
007	Creditor shall be allowed to send more than only one RR message, if necessary. If goods and real estate have been seized, the two assets need to be realised within different periods.	open
008	Allow for a group to represent the creditor party. There are cases when a group of people are tied together as the creditors for a particular debt (mostly with tax collections in some municipalities or states).	open
009	Allow or enforce the use of uuid for senderRefData, so the identifier is guaranteed to be unique accross all cases in the whole of Switzerland.	open
018	In the presence of a partial objection, the effect of CC original would be to continue using the undisputed amount acc. to §78/2 of the LP. The CC message may need an additional hint to the office saying that this is explicitly what the creditors wants to do.	open
019	SA shall contain the cost of a rejection, if any.	open
028	Specify a new "reminder" message, in case the office has forgotten to send attachments.	open
040	CC shall contain a new field saying what the payments have been since the CR.	open
042	Remove columns EGE_ID and SMA_ID from the directory	open
046	In the schema, remove "and time" from the sentence "date and time of this document" in the annotation to dateSent.	open
057	Introduce a new code to announce the presence of deferral according to the §123 LP. (just like there is one for §173a LP).	open
059	Do not reject CC novel just because the collection is a known one.	open
